

Materials and Technology Specialisations 2 (TTZ) – Year 10

Subject Outline:

Materials and Technology Specialisations 2 is the study of textiles in everyday activities. The subject will enable students to gain knowledge about textiles and learn valuable life skills such as basic hand and machine sewing.

Course Content: Whilst studying the subject students will be exposed to interesting concepts and ideas that will assist in making informed decisions regarding fashion and the textile industry. This exciting and creative subject explores the world of textiles and clothing. TTZ provides students with opportunities to engage in design challenges, expand their sewing skills and foster their creativity. Students will learn how to create wall art using various textile techniques, repair clothing, repurpose unused textile items, and construct their own unique items at a cheaper cost compared to high fashion clothing labels.

Unit Topics	
<ul style="list-style-type: none">• Fibre to Fabric• Get Creative	<ul style="list-style-type: none">• Introduction to Fashion• Reduce, Repurpose, Recycle

Assessment Outline: A variety of assessment techniques are used in the course. These may include: -
